

CARBOREAL

Climate Advocate 2025

Restaurant Savotta A&S Fam Oy

has compensated for the emissions caused by
Savotta's direct business operations

The company is committed to concrete climate actions by planting a new forest in Finland. This initiative captures carbon dioxide from the atmosphere, supports biodiversity and local communities, and helps mitigate climate change. The carbon sequestration generated by the project can in the future be utilized by Restaurant Savotta to offset its carbon dioxide emissions.

As a result of the climate actions enabled by the company, carbon dioxide will be removed from the atmosphere:

500 tonnes CO₂e

Helsinki, 4th of August 2025

The certificate is awarded in recognition of responsible practices and support for climate action in cooperation with Carboreal.

**Real forest.
Real impact.**
